APPROVED POSTING RUTGERS UNIV OBFUSCATION DEPT

April 1, 2010

AIR CLEANING NOTIFICATION

Between 2 AM and 4 AM on Saturday night, April 3, all air will be removed from the Hill Center tower. Some difficulty may be experienced by those in the tower. Air will be available outside the tower.

The air will be cleaned of pathogens and trace amounts of iridium caused by long-term use of chalk. To avoid structural damage to the Hill Center tower, the air will be replaced over this period by a liquid helium solution. The superconductivity of this material will also enhance the functioning of computers. Pets and plants should be removed from the building!

Students in the building at this time may have short-term distress which is regretted.
