Final Exam, Wednesday, May 5, 4 to 7 PM, separate location for each class to be announced.

Graphing calculators may be used on exams but calculators and computers with QWERTY keyboards or symbolic differentiation and integration programs are *not* allowed. Students may bring one sheet of paper containing notes (using both sides!) up to 8.5 by 11 inches in size to any exam. Review problems and other general information regarding this course can be found through the web page (look for spring 1999!)
